

ALLOUCHE MOHAMED ABDERRAHMANE

Software Engineer | Full-Stack Developer

Saïda, Algeria | allouche.m.abderrahmane@gmail.com | +213 778 337 081

PROFESSIONAL SUMMARY

Full-Stack Web Developer delivering secure, scalable, and production-ready web applications. Experienced in designing and building complete web solutions from backend architecture to modern, high-performance user interfaces. Focused on writing clean, reliable code and contributing effectively within development teams.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, Redux Toolkit, Vite, Html, Css
- **Backend:** Node.js, Express.js, REST APIs, PHP, Java, Go
- **Design:** Figma, Canva
- **Database:** PostgreSQL, MySQL, MongoDB
- **DevOps/Deployment:** Docker, Git/GitHub, CI/CD, Vercel,
- **Languages:** TypeScript, JavaScript, Python, C, SQL, Bash
- **Security:** OWASP Top 10, Vulnerability Assessment, API Security

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer (Hybrid) — SocShield DZ

- Implemented and tuned Wazuh SIEM end-to-end (log sources, rules, alerting, dashboards) to improve endpoint visibility and reduce blind spots across monitored systems.
- Executed security assessments (Burp Suite, Nmap) and produced actionable remediation notes to accelerate fixes and reduce repeat findings.
- Supported hardening and secure configuration reviews, improving incident readiness and strengthening baseline security controls.

PROJECTS

DevRush 1.0 — E-Learning Platform (Full-Stack)

- **Tech Stack:** React, Node.js, PostgreSQL, Docker, JWT
- **Action:** Developed a complete platform with role-based access control and a relational database schema.
- **Result:** Optimized backend queries to **reduce response times by 30-50%** and won **2nd Place** in the programming competition

Pulse-chat — Real-Time Chat App

- **Tech Stack:** WebSockets, Python (backend), REST API, TypeScript/JavaScript (frontend)
- **Action:** Built a live messaging UI that connects to a Python backend over REST + WebSockets for real-time message delivery and persistence.
- **Security:** Implemented secure authentication on the backend and added request validation + rate limiting to reduce abuse (spam/flooding) and protect chat endpoints.

Portfolio Builder (Full-Stack)

Devfolio — saas portfolio builder

- **Tech Stack:** TypeScript (frontend), FastAPI + Python (backend), HTML templating (Mako)
- **Action:** Built a portfolio builder that lets users create, customize, and preview portfolio websites via a responsive UI with reusable components, backed by APIs to manage portfolio data and generate/render HTML portfolio pages from templates.
- **Security:** Integrated secure authentication/authorization, server-side validation, and protections like CORS configuration and rate limiting/throttling to reduce unauthorized access and API abuse.

Nabta AI — Hackathon Finalist

- **Tech Stack:** React, AI Model Integration
- **Action:** Shipped a functional AI-driven UI under a tight competition deadline.
- **Result:** Achieved **Finalist** status by successfully turning complex model outputs into a user-friendly interface

EDUCATION

Bachelor of Computer Science | Université Dr. Moulay Tahar, Saïda, Algeria

• Completed L1 (2023–2024) and L2 (2024–2025); currently enrolled in L3 (final year). • Key coursework: Cybersecurity, Data Structures & Algorithms, Web development, Operating Systems, Linux Systems, AI & Machine Learning, Web Security

Certifications & Achievements

- **NVIDIA:** Fundamentals of Deep Learning (2024–2025)
- **HP:** Fundamentals of Deep Learning (2025)
- **Simplilearn:** CCNA Certification (2025)

- **Huawei:** HCIA – Datacom (2025)
- **English:** EFSET C1 (Professional Proficiency); IELTS Academic 6.5
- **French:** TCF B2
- **Award:** 2nd Place DevRush 1.0 Programming Competition (2025)
